**From Cart**

Click "Choose image" link

Pop-up explains that the item is being taken out of the cart. Click Yes.

→

**While you are finishing your work on this printed job...**

We will remove this item from the cart, so that we can whisk you back to our print designer to finish your work. After you are finished, please add this item back to the cart.

If you are unsure of whether you will be able to finish the image selection process, you may wish to add this item to your saved items list first (if you haven't already done so).

Do you wish to proceed?

Yes    No

Item returned to widget exactly as if a Saved Item were being returned to the widget, except the print menu is expanded and the choose image popup is open.

Make image selections

Yes → Find becomes clickable

No ↓

Change "makeup" parameters other than print? *

Yes → Find becomes clickable

No ↓

Click Save. Or click Add to cart to return this to the cart; checkout goes back to being disabled. If neither action is taken original incomplete MOD is still "findable."

Clicking Find produces fresh result, without image. Although no longer in the cart, original incomplete MOD is still "findable" even if not saved.

Change "makeup" parameters other than print? *

Yes → Clicking Find produces fresh result (with image if print selections intact after parameter changes). Although no longer in the cart, original incomplete MOD is still "findable" even if not saved.

No ↓

Clicking Find refreshes result (still working with same MOD and quote from the cart). "Quoted without image" goes away. Other quotes on this MOD are updated with image details.

Change "makeup" parameters other than print? *

Yes → Clicking Find produces fresh result (with image if print selections intact after parameter changes). Although no longer in the cart, original incomplete MOD is still "findable" even if not saved.

No ↓

Click Add to cart to return this to the cart. Checkout is now enabled.

*Such as dimensions, materials and packaging. Also includes packout in the results area (in which case, Find does not need to be clicked. The MOD changes over on the fly.) If the user makes a change to zip code, freight terms, quantity or price breaks before any "makeup" parameters are changed (ie, while they are still working with the same MOD), they will get the usual prompts about revising existing price or creating a new price (quote). If the zip code is changed, they will get the usual zip code cart conflict prompts.
